By VIRGIL PINKLEY

Exclusive to The Edmonton Bulletin Copyright, 1943, by British United Press ALLIED HEADQUARTERS, North Africa, March 3. —Marshal Brwin Rommel hastily was hauling men and equipment northward through the Gabes bottleneck tonight and additional pressure from the British First Army in the north made it appear that the complete envelopment of the last Axis forces in Africa was inevitable.

The British Eighth Army was close on the heels of the Africa Corps as it fled northward, the pace of the Axis retreat indicated an early juncture of Gen. Sir Bernard L. Montgomery's men and the American forces commanded by Lt.-Gen. George S. Patton, Jr.

The British First Army, seizing thestown of Sedjenano only 28 miles from the Axis naval base of Bizert

Front line dispatches reporting an advance by Amer-forces to an important road junction 15 miles southican forces to an important road junction to make south-cast of El Guettar on the central front said that the Ger-mans apparently were evacuating that zone as Rommel fell back northward through the Gabes gap. This develop-ment as well as the fact that Rommel for the time being was attempting no important counter-tatacks suggested that the enemy was pulling out of the entire southern Tu-

Summary

Canadian Ukrainians Asking Independent German Forgery Territory in Europe

Australia, New Zealand Continue Air Training Plan

T.C.A. SPANS THE CONTINENT Twice Each Day

T.C.A. has overcome the barriers of distance—shrunk the wast expanse of the Nation — until the shores of the Atlantic are but a day's distance from the shores of the Pacific. Canada's National Air Service speeds

the men, materials and mails essential to Victory — 104,446 passengers, 2,309,000 pounds

of air mail and 363,000 pounds of air express last year. The many wartime activities of T.C.A. include the overhaul of the air transports flying the Atlantic

lers and instruments of military aircraft.

In war as in peace, T.C.A.
is an essential arm of the

Nation's transport.

No Major Changes Planned In Canada's Grain Program Despite Criticism in House

Despite Criticism in House
By JAMES McCook
OTTAWA. March 31.—(CP)—Trade Minister MacKinnon and Agriculture Minister Gardiner yesterday spoke in gupport of the government grain marketing policy and production programs in the House of Commons and said 1943 plans already outlined would remain substantially unchanged.

HERE'S THE ANSWER, HERR HITLER

THINK back a while, Herr Hitler. Remember when you couldn't put your mind to anything but armaments and super highways? You forgot about your railways then, didn't you? You just let them tag along.

That's where we think you were wrong, Herr Hitler.

the democracies you refer to. We weren't looking for war-but we were ready to do our job. That's why we had the best of rolling stock and locomotives . . . modern roadbeds . . . improved equipment and trained personnel. We meant

them for peace-time. You're learning now how useful they've been in war . . . carrying the biggest load in our history, most of it stuff for licking you. Don't you wish you had railways like ours,

Herr Hitler? With Air Force locomotive-busters adding to your troubles, wouldn't it be fine?

But it's too late now, Herr Hitler. Goering sold you the idea of guns instead of butter and then promised "No bombs will fall on Germany." One way and another, it's left the railways as your particular headache.

And it's all yours, Herr Hitler-not ours!

MARCH 31, 1943.

TO

When light strikes a surface, high in reflection value, it bounces back like a rubber ball. But dark, dingy surfaces absorb light; they blot it out.

In many industrial plants and factories across the country the secret of keeping light bouncing has meant great savings in electrical power used. Ceilings, walls and floors have been turned into huge reflectors by painting with light

reflecting finishes. There are no dark surfaces to blot out the lumens (units of light). With no increase in power, there have been important increases in illumination. Today, conservation of electrical energy is essential to Canada's industrial effort. The amount of power available

is definitely limited. It must be made to go as far as possible.

"Bouncing Light" helps to stretch our vital supplies of power.

The Paint & Varnish Division of C-I-L produces finishes of high quality and durability. Executives interested in the possibilities of "Bouncing Light" may take advantage of the Division's knowledge regarding the use of paint in

"Right Face" for Today

In a recent issue of the Saturday Evening Post, Elizabeth Arden draws a clear picture of beauty in action. Let the Elizabeth Arden representative at The BAY show you the Victory Red make-up which Elizabeth Arden describes ... preparations for Simplified Skin Care that cut minutes off precious time . .. Elizabeth Arden beauty did designed for these times and this new beauty.

For your "Right Face"

TO HELP YOU SAFEGUARD YOUR WAR SECURITIES

You have made a patriotic investment in Victory Bonds . . . or War Loan Bonds . . . or War Savings Certificates . . . perhaps all three . . . to help your country in the war . . . and to help assure your after-war future.

To enable you to preserve your war securities from danger of loss by fire or theft, Canada's Chartered Banks offer a safekeeping service. Here are the details:

VICTORY BONDS and WAR LOAN BONDS - Take them to your bank . to any branch of any chartered bank . . . the bank will put them into safekeeping for you, will clip your coupons when the interest falls due, and will deposit the money to your name . . . If you haven't a bank account you can authorize the bank to open one for your convenience.

> The total charge for this service and safekeeping is only 25 ce a year on bonds (no maiter how many) up to \$250 . . . one-tenth of one per cent on amounts over \$250.

WAR SAVINGS CERTIFICATES - You can lodge them also with your bank . . , which will take them into safekeeping and for just one small charge er the whole of the time (or any part of it) from purchase to maturity. Here is all it will cost you — not just for one year — but for $7\frac{1}{2}$ years:

For	a	\$ 5.00	certificate	٠,																\$0.10
For	a	\$ 10.00	certificate	١.								ì				ì				:15
For	a	\$ 25.00	certificate	١.															ì	.20
For	a	\$ 50.00	certificate	١.									ì		ì				Ĵ	.25
For	a	\$ 100.00	certificate																	.50
			certificate																	1.00
